2024-2025

Orthopaedic Traumatology Fellowship

University of Washington/Harborview Medical Center Department of Orthopaedics & Sports Medicine Trauma Service

Mission

The mission of the Orthopaedic Traumatology Advanced Clinical Experience (TACE) is to facilitate the development of outstanding orthopaedic trauma surgeons. The TACE can organize a trauma team that adequately manages problems of polytraumatized patients, in academic or non-academic settings. The TACE possesses a solid clinical foundation, as well as advanced traumatology skills.

Program Overview

The Orthopaedic Traumatology Advanced Clinical Experience (TACE) is a 12-month program designed for board eligible orthopaedic surgeons, after their residency training. By providing a complete experience involving patient care, teaching, and opportunities for basic and clinical research, the TACE curriculum satisfies the developing criteria for a Certificate for Specific Expertise in Orthopaedic Traumatology and is accredited by the OTA Fellowship Committee guidelines and requirements. This experience exposes the orthopaedist to the organization and management of a Level 1 Academic Trauma Center, and to the function of the orthopaedic traumatologist in this setting. Clinical experience and teaching are profuse. The clinical component of the TACE introduces the orthopaedist to many operative and nonoperative techniques used in polytrauma with special emphasis on stable internal fixation. Advanced and innovative techniques of internal fixation are emphasized.

The TACE rotates through five individual clinical services. The clinical rotations are approximately 2.5 months in duration. Each service or team consists of the TACE, a chief resident, a junior resident, and nurse practitioners. Medical students are frequently a component of the team. Nine full-time equivalent experienced faculty members are divided among the teams. Each team has sub-specialty emphasis and dedication. Trauma related team sub-specialty areas include acute foot/ankle trauma and post-traumatic reconstruction, complex periarticular fractures, pelvic/acetabular injuries, proximal humeral arthroplasty for fractures, complex elbow fractures and fracture-dislocations, nonunion and deformity reconstruction, among others.

2023-2024 ACEs, from L to R: Dr. Conor Kleweno, Dr. Jonah Hebert-Davies, Dr. Erika Roddy, Dr. Loren Black (ACE), Dr. Abhinav Janghala (ACE), Dr. Ryan Anthony (ACE), Dr. Thomas Seaver (ACE), Dr. David Barei, Dr. Noelle Van Rysselberghe (ACE), Dr. Michael Githens, Dr. Reza Firoozabadi, Dr. Lisa Taitsman and Dr. Stephen Benirschke

Program History

The University of Washington assumed control of the King County Medical Center, now Harborview Medical Center. Donald Gunn, M.D. was the Chief of Orthopaedics at HMC in 1968-1969, Sigvard T. Hansen Jr., M.D. was the Chief Resident in Orthopaedic Surgery, and D. Kay Clawson, M.D. was the Chief of Orthopaedics for the University of Washington, of which Harborview Medical Center was a major component.

Dr. Hansen visited Gerhardt Kuntscher and learned advanced techniques of medullary nail-ing. He was involved in the early North American AO/ASIF development and, in particular, worked with Hans Willenegger.

Dr. Hansen became chief of Orthopaedics at Harborview Medical Center and established the roots of aggressive management of long bone and pelvic fractures. In 1973 Drs. Clawson and Hansen attended the AO Course in Davos, Switzerland. Thereafter, stable fixation became the treatment of choice at Harborview Medical Center.

Fellowship Faculty

Program Director:
David P. Barei, MD, FRCS
Professor of Orthopaedics & Sports
Medicine, University of Washington
School of Medicine Director of University
of Washington Trauma Education

Reza Firoozabadi, MD
Associate Professor of
Orthopaedics & Sports Medicine,
University of Washington School of
Medicine

**Daphne Beingessner,
MSc, MD, FRCS**
Professor of Orthopaedics & Sports
Medicine, University of Washington
School of Medicine

Michael Githens, MD, MS
Associate Professor of
Orthopaedics & Sports Medicine,
University of Washington School of
Medicine

Stephen Benirschke, MD
Professor of Orthopaedics & Sports
Medicine, University of Washington
School of Medicine

Jonah Hebert-Davies, MD
Associate Professor of
Orthopaedics & Sports Medicine,
University of Washington School of
Medicine

Robert P. Dunbar Jr., MD
Associate Professor of Orthopaedics &
Sports Medicine, University of
Washington School of Medicine

M. Bradford Henley, MD, MBA
Professor Emeritus of Orthopaedics &
Sports Medicine,
University of Washington School of
Medicine

Fellowship Faculty

Conor Kleweno, MD
Associate Professor of Orthopaedics & Sports Medicine
University of Washington School of Medicine

Sean Nork, MD
Professor of Orthopaedics & Sports Medicine
University of Washington School of Medicine Chief of Orthopaedic Trauma
Harborview Medical Center

Lisa Taitzman, MD, MPH
Professor of Orthopaedics & Sports Medicine
University of Washington School of Medicine
Vice Chair of Education

Erika Roddy, MD
Assistant Professor of Orthopaedics & Sports Medicine
University of Washington School of Medicine

Fellowship Specifics

The TACE takes approximately 6 calls per month averaged over the year. The primary on-call responsibilities in the hospital belong to the junior and senior UW HMC orthopaedic residents. Commonly, one junior resident is assigned to the ward, and one to the Emergency Department. The TACE may take call from home, or in the hospital with the team. An attending faculty member participates on call with the team each night.

The TACE works in the assigned team's orthopaedic clinic one day per week. The TACEs clinical responsibilities include operative procedures as surgeon and assistant, daily ward rounds, and emergency patient care along with the chief or junior resident. The average ward census for an ACE is fifteen to twenty patients covered primarily by the junior orthopaedic resident, supervised by the chief resident. One elective operating day per attending is assigned, and other operative procedures are scheduled throughout the week.

At least one basic science or clinical project is required during the year. Ideally, a clinical project is a prospective clinical trial. A trauma data base facilitates other clinical projects. The facilities for basic science research are located in the new Research Building at Harborview. Biomechanical studies related to internal fixation of numerous fractures have been designed and implemented by former TACEs. Similarly, almost any investigation can be developed.

Trauma Rotation Weekly Schedule

	BLUE	GREEN	RED	FOOT/RESEARCH	PELVIS
MON	HMC Operating Room	HMC Operating Room (Hebert-Davies)	HMC Operating Room	<u>Pelvic Clinic:</u> 1-West Trauma Clinic	HMC Operating Room
TUES	1-West Trauma Clinic	HMC Operating Room (Kleweno/Nork/Taitsman)	HMC Operating Room (Firoozabadi)	HMC Operating Room (Benirschke)	HMC Operating Room
WED	HMC Operating Room (Beingessner)	1-West Trauma Clinic	HMC Operating Room (Dunbar)	HMC Foot & Ankle Clinic	HMC Operating Room (50% of time)
THUR	HMC Operating Room (Barei)	HMC Operating Room (Kleweno/Nork)	1-West Trauma Clinic	HMC Operating Room (Pelvis or Benirschke)	HMC Operating Room
FRI	HMC Operating Room	HMC Operating Room	HMC Operating Room (Githens)	HMC Operating Room (Benirschke)	HMC Operating Room

Meet Our Current Trauma ACEs

William Davis, MD

Dr. Davis received his Doctor of Medicine from the University of Alabama Birmingham School of Medicine in Birmingham, AL. He completed his Orthopedic Surgery Residency at the University of Alabama in Birmingham, AL

Joseph Dynako, MD

Dr. Dynako received his Doctor of Medicine from Indiana University School of Medicine in Indianapolis, IN. He completed his Orthopedic Surgery Residency at the University of Mississippi in Jackson, MS.

Zachary Rockov, MD

Dr. Rockov received his Doctor of Medicine from the University of Arizona School of Medicine in Tucson, AZ. He completed his Orthopedic Surgery Residency at Cedars Sinai Medical Center in Los Angeles, CA.

Alexander Roszman, MD

Dr. Roszman received his Doctor of Medicine from the University of Toledo College of Medicine and Life Sciences in Toledo, OH. He completed his Orthopedic Surgery Residency at the University of Alabama in Birmingham, MA.

Lillia Steffenson, MD

Dr. Steffenson received her Doctor of Medicine from the University of Cincinnati College of Medicine in Cincinnati, OH. She completed her Orthopaedic Surgery Residency at the University of Utah in Salt Lake City, UT
