

Hello everyone! 13 years after leaving the UW following ortho residency, and of course The Shoulder Fellowship, San Diego continues to treat me right. Literally every day I somehow use something that was taught to me by Dr. Matsen and Dr. Smith. Lots of great memories that I am thankful for and appreciate now more than ever.

All of the training I was fortunate enough to get has served me well as I have built a private practice that has now been 100% shoulder for the past 5 years. In 2017 I did 150 shoulder arthroplasties and 200 shoulder scopes and 2018 is shaping up to grow even more.

For the past 10 years I have also been co-director of a successful MSK ultrasound course held twice a year in beautiful Las Vegas (orthosono.com) and have been involved with implant design with the DJO Altivate reverse stem. I have Dr. Matsen to thank for the intro to the ultrasound when I was his fellow as I caught that wave at just the right time. The fellowship has opened doors that otherwise likely would have been closed.

I also followed another passion of mine by co-founding and opening Bay City Brewing Company, a craft brewery in San Diego in 2015 (baycitybrewingco.com). Many of you had the opportunity to visit during the 2017 AAOS and I expect to see all of you there at some point in the future! Please don't hesitate to contact me if you are visiting San Diego.

Ben DuBois
